## Digisix

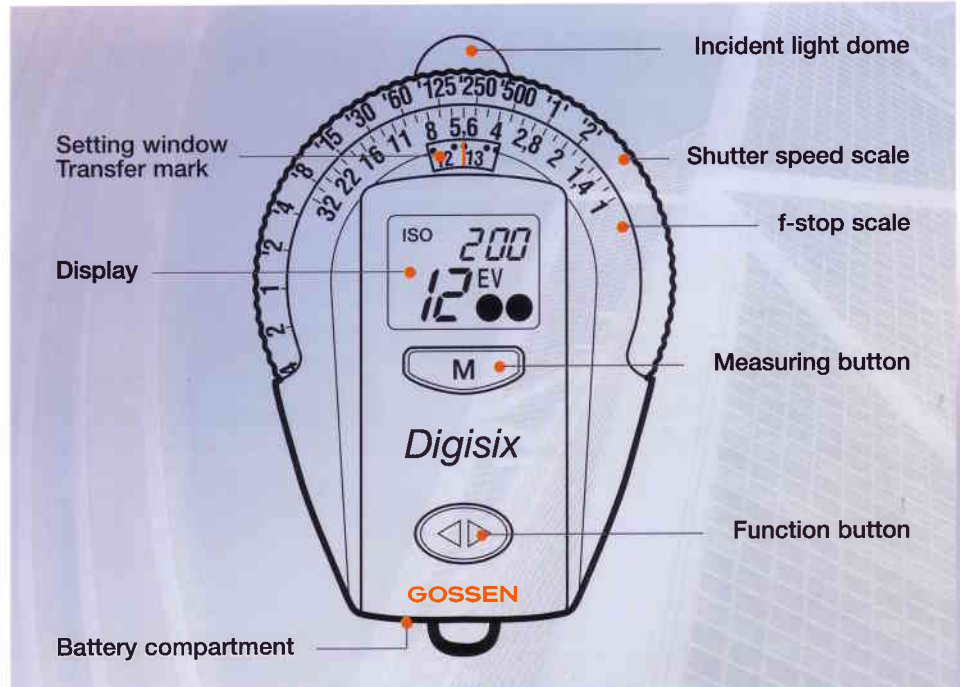

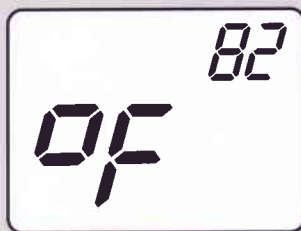

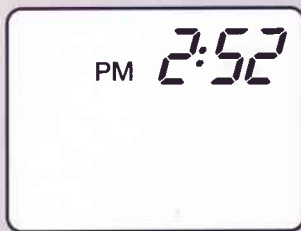

digital exposure meter with analogue settings - for ambient light - maximum features in minimum size

The Digisix is a digital exposure meter for ambient light made in Germany by GOSSEN.

Measuring is easy: The EV-value is measured and indicated in the digital display, and then transferred to the setting ring. All the useful shutter speed/f-stop combinations can be read at a glance.

The most interesting features are:

- Incident and reflected light measuring mode
- Microprocessor controlled operation
- Digital LCD display of read out in 1/3 stops
- Storage of values measured
- At-a-glance indication of all suitable combinations of shutter speeds (t) and aperture (f-stops)
- "Range over" or "Range Under" signal
- TIMER function
- WATCH and ALARM function
- Temperature measurement function

<b>Meter Type</b>	Digital Exposure Meter
<b>Measuring modes</b>	Ambient light Incident light Reflected light Contrast measurement
<b>Light sensor</b>	sbc photo diode
<b>Measuring range (at ISO 100/21°)</b>	EV 0 to 18
<b>Shutter speeds</b>	t = 1/2000 sec to 4 min
<b>Aperture/f-stops</b>	f/1 to f/32
<b>Correction values</b>	+/- 3,0
<b>Film speeds</b>	ISO 6 to 3200 in 1/3 increments
<b>Measuring angle - Reflected light mode</b>	approx. 25°
<b>Timer</b>	0 sec to 30 min
<b>Watch</b>	12 h or 24 h display
<b>Accuracy</b>	5 min/year
<b>Thermometer</b>	adjustable to °C or °F
<b>Measuring range</b>	-15°C to 70°C or 5°F to 160°F
<b>Accuracy</b>	+/- 2°C or +/- 4°F
<b>General data</b>	
<b>Display</b>	Digital LCD-display and setting ring
<b>Battery</b>	1x3 V Lithium battery CR 2032
<b>Operating temp. range</b>	-10°C to 60°C
<b>Dimensions</b>	approx. 75mm x 50mm x 23mm
<b>Weight</b>	approx. 40g incl. battery
<b>Accessories included</b>	Battery, carrying case, cord, instruction manual
<b>Optional accessory</b>	Mounting clip for camera shoes. At additional price, Order code V069A
